**4. B-4 T3B PLASTIC TYPE III BARRICADE SYSTEM:**

T3B barricade products from JMW, Inc. are the perfect answer to compliance with the requirements of Federal Report #NCHRP 350. Our barricade parts are lightweight, easy to use, and durable: a 6-foot Xtube upright weighs only a little over 3 pounds, and 8-foot 1x8-inch T3B polycomb panel weighs only 5 pounds. The entire upright assembly for an 8-foot Type III barricade weighs only 22 pounds! Compare that to a traditional 4 x 4 and plywood barricade weighing well over 100 pounds! The T3B takes up about half as much space in transport as a plastic drum, and sets up in just seconds.

- Please specify sheeting and quantity for pricing quote.

5

**5. B-5 BARRICADE STRIPING TAPE:**

Highly reflective Engineer Grade striping tape helps bring your barricades up to code. When affixed to safety barricades, tape helps to cordon off work sites and other prohibited areas. Pressure-sensitive backing allows for quick, easy application. Two sizes and two directions.

- Red/White Sheeting Available.
- 6” x 50 yards EG — \$125.00
- 6” x 50 yards HI — \$215.00
- 8” x 50 yards EG — \$165.00

## MEASURING WHEELS

1 - 400 Series

**BEST SELLER!**

1 - 415 Series

**1. M-1 400 SERIES:** When a tough, all-purpose measuring wheel is needed, nothing fills the order like the Rolatape 400 Series. Its 4-foot circumference handles the toughest measuring needs for heavy construction, large commercial operations, utility companies, land surveying and other critical measuring applications. When measuring demands are tough, the 400 Series gets the job done.

**400 Series Applications:** Construction, utilities, cable, telecommunications & land Surveying.

**400 Series Features:** All steel construction, 5-digit counter, 4-foot circumference wheel, wheel stand & wheel brake.

**400 Series Benefits:** Heavy-duty strength and durability, records up to 100,000 feet or meters with convenient rest knob (dual counters available), Easier to measure accurately on rough terrain, keeps wheel upright when not in use, transport to second site without losing existing measurements.

- 400 or 415 Series – \$133.95
- Add Clicker / Counter Package – \$56.50 each

**2. M-2 RR318N:** Best seller! 5-digit, easy-read, magnified counter measures 9,999 feet, 11 inches (or 9/10ths of a foot with engineers' models, or meters and decimeters) without resetting. That's almost two miles! Heavy-duty, ABS wheel with improved, clean three-spoke design. Curved, telescoping handle adjusts to comfort level. Units: ft, in. Diameter: 12 1/2 in. Circumference: 3 ft.

• **RR318N – \$74.95**

**4. M-4 MP401E ELECTRONIC MEASURING WHEEL:**

The MP401E is the only electronic wheel with a steel frame. It is the world's sturdiest electronic measuring wheel, and we think it's the easiest and the most comfortable to use. We are confident that it will stand up to the harshest field conditions. Great for contractors, estimators, engineers, landscapers, paving contractors, fencing specialists, real estate pros, utility personnel, surveyors, police work, facility engineers, and telecommunications contractors. Comes with a swan-neck, ergonomic handle; our patent-pending thumb-up grip ensures less wrist strain and superior control. Our huge digital counter is in the most protected spot on the wheel. With the handle up, it is nearly impossible for the counter to come into contact with the ground. With the handle down, the roll bar offers solid protection. Innovative, simple center-line design, great balance. Rugged 3/4" steel tubing – strongest frame in the field. Compact fold-down – easily reduces to 1/2 its size for storage and portability. Storage is a snap. Specs: Backlight LCD display for low-light usage, Auto Shut-off extends battery life, Display: LCD segment; 7 digits; up to 99,999.9 ft. 11 in. or 99,999.9 in tenths and metric, Number size: 1/2 inch, Warranty: 2 year limited, Product Weight: 7 lbs. (3.17 kg), Length: Extended: 42 in. (106.7 cm); Storage: 21 in. (53.4 cm), Accuracy: 2 inches in 100 feet, 99.8%, Wheel: 4ft. (1.22 m) circ.; 15 1/2 in. (31.75 cm) dia., Frame material: 3/4 in. steel tubing, Collapsing method: 1 fail-safe barrel clamp.

• **MP401E – \$185.00**

**3. M-3 RRT12:** Enhanced grip pistol-type handle increases control and comfort. Re-set on the handle and on the unit housing –no more bending over, lifting the wheel or stepping on it to reset to zero. Additionally, the re-set on the housing is reinforced to protect it when re-setting the counter with your foot. Brake on pistol grip – stop counting instantly. Stop adding lengths accidentally by putting the brake on exactly when you need it. Collapsing hinge –snaps into extended lock with the flick of the wrist and it disconnects if you forget to press the unlock trigger. Center-line handle design with counter on top of wheel –center of gravity aligned for perfect balance. This makes measuring easier and more accurate. The raised counter makes reading it easier. Compact fold-down – easily reduces to 1/2 its size for storage and portability. Storage is a snap. Flip-down kickstand (3 foot size) – keeps the wheel upright when you need your hands free to perform other tasks and stays out of the way as you measure. Gear & shaft transmission for highest measurement accuracy and strength. No belts to stretch or fail. Handle lock –lock your handle in place when you're not using the wheel. Our clamp protects the extension hinge from breaking.

• **RRT12 - \$87.50**

**5. M-5 MP401:** Innovative, simple center-line design, great balance. Rugged 3/4 steel tubing, strongest frame in the field. Time-tested and proven counters; huge numbers. Only two moving parts (rest and ticker). Superior counter protection and placement. 5-digit counter, up to 99,999 feet. Compact fold-down, easily reduces to 1/2 its size for storage and portability.

• **MP401 – \$137.50**

**1. E-1 STAKE CHASERS:** Our most famous and widely used product. Our 6-inch Stake Chaser® brand marking Whiskers® are trusted for their durability and flexibility. Designed to provide maximum visibility and withstand multiple passes of a grader blade, our first product is perfect for road construction. Over the years, however, these safe easy-to-spot Whiskers have also become a prime choice for marking buried utility lines, survey points, and even athletic fields. **6" Stake Chasers can be easily hammered into a wooden stake or quickly fit onto a 60 penny (60d) nail, and are available in 9 highly visible colors.**

Permit Faster Grader Operation: Since the STAKE CHASER is always visible, the grader operator doesn't have to wait on the Stake runner to point out the blue top stake. Quantity is 1 M / box and colors are Blue, Red, Orange, White, Green and Pink.

**5. A-5 SURFA SLICK LUTES:**

This dual purpose lute, rake bar and pole are made of magnesium, which has the strength and spring of steel but is one-third lighter than aluminum. Magnesium's abrasion resistance and high heat conductivity add to Surfa Slick's reputation for ruggedness and long life.

The strong T-Beam Lute is available in two ways—plain on both sides or serrated on one side with teeth that have slightly blunted points and rounded notches to permit material to pass through without jamming. To assemble or replace lute blades, only two bolts need to be inserted in the high strength special alloy lute bar holder, and the lute is ready for working.

The modern design of this tool makes it easy to work and easy to clean.

# BROOMS & BROOM REFILLS

**1. CB-1 FLAT OR CONVOLUTED WAFERS:** Installing our quality-built wafers provide long lasting durability resulting in more time between change-overs. A full set is easily installed by one person. Available in flat or spacerless convoluted. We offer poly for normal sweeping, wire for heavy sweeping and combo for medium sweeping.

**Poly** – for normal sweeping. Constructed of virgin polypropylene material. Strict quality control standards assure uniform balance in every section for even sweeping.

**Wire** – for heavy sweeping. Spring tempered crimped steel wire. Proven as the industry leader through years of experience. The heavy-gauge steel bristles in each wafer meet the demands of caked mud, stone and heavy debris.

**Combo** – for medium sweeping. Combination of wire and poly wafers. Customized to your specifications for any medium-duty sweeping, any time of year

**Convoluted** – spacerless wafer available in poly and wire filaments. With the spacer eliminated, your brush assembles easier and quicker to minimize costly downtime. Each convoluted section creates a sweeping action to the right and left to utilize the natural flicking characteristics of the bristles. Each section is only 5/8" wide but sweeps a 3" path. Your brushes wear longer without streaking.
